What are the benefits of registering my software?

Registering your software is a simple process that provides you with additional support in case you need it. If you require assistance with your product, simply follow the steps below.

1. Register your software by providing your name and e-mail.

2. Contact our support team (support@novaworkssoftware.com) using the e-mail you have provided with any question you have.

One of our support representatives will help you as soon as possible. For the fastest response time, please provide the name of the software you are using in the subject line of your message.

Registering your product also provides you with a chance to sign up for our free monthly newsletter. Our newsletter contains articles and information such as SEC and industry news, updates on Novaworks software and products, and free Legato scripts.
