
What is the EDGAR PMAC?

Last Modified on 02/13/2020 6:04 pm EST

The Password Modification Authorization Code (PMAC) is an EDGAR access code that is used specifically to modify the Password that is used to log into the EDGAR system for a particular CIK. This code is automatically generated by EDGAR upon acceptance of your Form ID and can be generated by EDGAR upon request via the [EDGAR Filer Management Website](#), using your EDGAR Passphrase. Because the PMAC is used to update your EDGAR password, you should keep it strictly controlled and confidential.

The PMAC is an eight-character code that has at least one number (0-9) and at least one special character (@, #, \$, *). It is case-sensitive. You must provide your PMAC when [updating your EDGAR Password](#).
