

How can I check which modules I own?

Last Modified on 07/14/2026 1:24 pm EDT

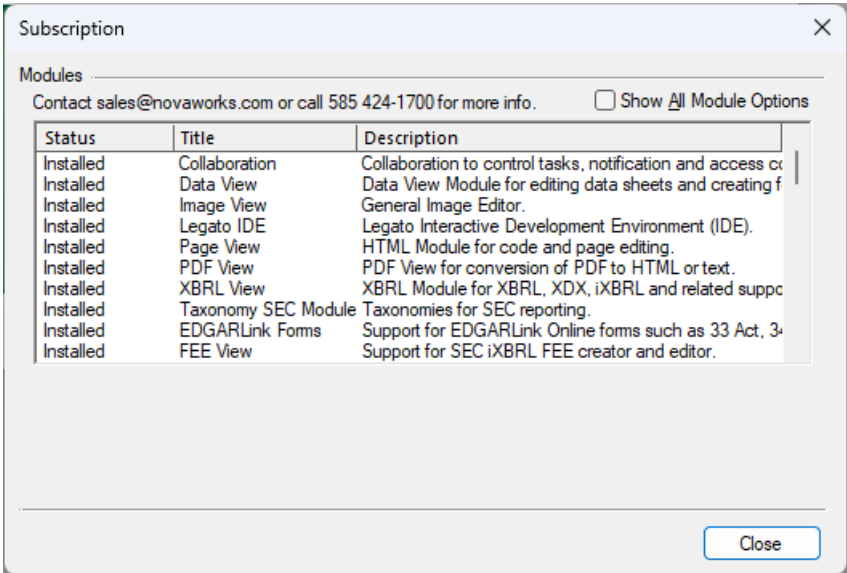

GoFiler can show you which software modules you own and also have installed on the current computer through the About dialog. The About dialog can be accessed through the Help menu.

To view your module and subscription information in the About dialog:

1. Click the **?** button in the upper right-hand corner of the application window.
2. Click **About**.
3. Click the *Subscription* button in the lower left of the dialog.

The modules available for your subscription will be displayed in the **Subscription** dialog:

This dialog shows all of the modules that are currently installed on the computer, as well as any modules you own but have not installed. The status of each module is located in the *Status* column. If you would like to see the available modules that you have not purchased, click the option to *Show All Module Options*.

Modules can be added to your subscription at any time. Contact your account executive by calling (585) 424-1700 or e-mailing sales@novaworks.com for help adding a module to your subscription.
